

When you purchase an MVA face mask, you should be aware that current CDC guidance advises that two or more layers of breathable fabric help prevent COVID-19 exposure to you and those around you. For this reason, we recommend that you wear your MVA mask over a disposable surgical mask, which will give you two layers of protection. Both inner and outer masks should completely cover your nose and mouth and fit snugly against the sides of your face without gaps. Following these instructions will help protect you and those in your proximity from COVID-19 exposure. Thank you for following this important health and safety detail.
